31 August 2025	Complete works and remove traffic management

<b>Key Contacts</b>	

### Project Description

A programme of works on the A90 Aberdeen Western Peripheral Route / Balmedie – Tipperty for surfacing repairs at Milltimber (northbound and southbound) are due to commence on Sunday 24 August 2025.

Lane closures will be in place 24 hours a day for the duration of the works to allow material to cure with a convoy system used overnight to ensure safety of operatives. The work will be completed in one operation, with a completion date of Sunday 31 August 2025.

### Key Messages

- These are essential repairs and remedial works that cannot be carried out within either a normal off-peak or an overnight period.
- Introducing a convoy system overnight will slow traffic to provide a safer working environment for the workforce.
- Lane closures during the day may lead to some congestion and possible delays, particularly at peak times.
